

We measure to you

Laser alignment keeps your business running smoothly

Is your system wasting you time and money? If the answer is “yes,” call on Bassett Mechanical. Whether you need to set up a mechanical system or are experiencing problems with your current system, our experts are there for you. Our OPTALIGN® laser shaft alignment system is accurate to the millimeter and unlike dial indicators, which can take up to eight hours to shim a motor, much less time consuming to set up and much more reliable.

Proper alignment will

- Increase equipment reliability
- Extend bearing, seal and coupling life
- Reduce power consumption
- Eliminate vibration and noise

Bassett Mechanical helps you with every shaft alignment need

- Shaft alignment
- Refrigeration compressors, air compressors and pumps
- For large direct-driven equipment

Our Experience Counts!

- Refrigeration — food plants
- Water treatment processes
- Paper industry
- Industrial or commercial
