Stainless steel fabrication: Bassett keeps it clean

When you need contaminant-free fabrication, and you need it fast, call on Bassett's stainless steel shop. Our enclosed, isolated work environment and expert team ensure you the cleanest products, quickly. We can produce small ductwork fittings, pressure vessels and anything in stainless steel that the dairy, food processing and paper industry may require.

Bassett Mechanical helps you with stainless steel fabrication

- Quick fabrication of contaminant-free components
- An isolated, 40- by 120-foot clean work area
- Large or small quantity orders
- Competitive pricing
- Various finishes: 2B, 4 or 8
- Grades of stainless steel are 304 or 316 and low carbon type 304L or 316L

Our Experience Counts!

- Expert tradespeople
- High-tech equipment
- Experience in food processing, dairy and paper industries

We also provide

- Complete HVAC design/build
- Electronic controls
- Dust and fume collection
