

Weld Station Fume Collectors

Whether you need to contain and collect welding fumes or paper dust, Bassett can fabricate a system that suits your needs. We can custom design a particulate collection system that will capture and control most common airborne contaminants. Whether it is a completely new system, or a partial system that needs to fit existing equipment, Bassett will fabricate to fit any workplace, however large or small.

Industry Experience

- Paper mills
- Foundry operations
- Stone cutting
- Dust fumes
- Weld fumes

Fabricating to Specifications

- Bag house
- Cartridge collector
- Scrubbing systems

By collecting dust particles, these systems will remove the haze and potential settled material in any shop. Opening a trap door and emptying a bin makes removal of all particles simple and fast.
