More than 60 welders and over 200 welding certifications

METAL FABRICATING

2014 Wisconsin Corporate Safety Award

2009 Wisconsin Family Business of the Year

Named Supplier of the Year by Heinz North America – 2009

Named Wisconsin Manufacturer of Year – 2007

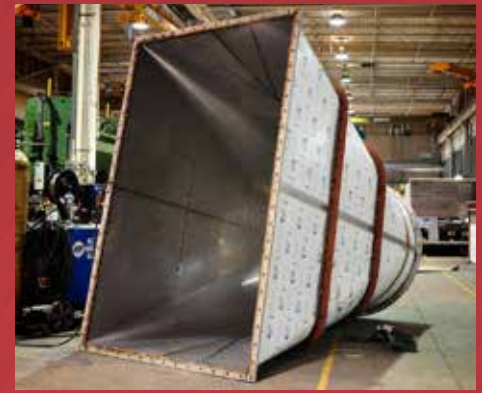

Named Supplier of the Year by Ocean Spray – 2006

28,000 gallon Pressure Vessels

Atmospheric Storage Tank

Industrial Ventilation System

CUSTOM AND SPECIALIZED MANUFACTURING

- Our 278,000 sq. ft. facility in Kaukauna, WI, manufactures specialized components and structures made from a variety of materials including structural steel, super duplex stainless and stainless steel, carbon steel, titanium, aluminum, nickel, copper and other alloys, incorporating thickness from 26ga sheet to over 3" thick plate
- Bassett has capabilities and expertise to fabricate custom tanks, vessels and components/assemblies for various OEM equipment
- Our warranty claims have averaged less than .4% of revenue for the last three years

EXPERIENCE COUNTS

- As a domestic and international provider of custom manufacturing services, Bassett has been a trusted supplier to industry leaders in the food, energy, construction, marine, manufacturing and paper industries for 75+ years
- Bassett Mechanical has been practicing the principles of Lean since 2006 and these principles are fully integrated into our day-to-day operations and business model
- Bassett is ISO 9001:2000 certified
- 18 dedicated project managers and 15 engineers

OPTIONS ARE ENDLESS

- Custom OEM components and sub-assemblies manufacturing (metal sheet, plate or structural steel for plant equipment and duct work)
- Tanks & ASME Section VIII-1 ("U" Stamp) Pressure Vessels (pressure, process & storage vessels)
- Wind towers and wind tower components (embedment rings, templates, pedestal forms, grout rings, levelers, internals kits, man-way platforms)
- ASME B31 pipe fabrication (skid units, piping spools, pipe manifolds, prefab piping)
- Over 200 welding certifications and more than 60 welders
- Capability to engineer, design and fabricate according to ASME, PVHO, PE ("CE" Stamp), CSA, B51, AWS Codes and more
- Large scale dedicated space for fabricating food grade and stainless/high alloy products in a controlled environment

Bassett has the ability to provide all of these services to ensure the highest quality and consistency.

- Pipe spooling
- Stainless steel & alloy fabrication
- Valve assemblies
- Skid packages
- High temp/Low temp insulated and cladded ducting
- Structural/general steel fabrications
- Custom industrial heating, cooling and refrigeration systems
- Industrial ventilation systems
- Plumbing and piping systems
- Gas systems
- Dust collection
- Systems controls & control integration
