

BASSETT MECHANICAL

- CONTRACTING ▪ ENGINEERING
- METAL FABRICATING ▪ SERVICE

Industrial Refrigeration

Our unique combination of engineering, technical, and field management expertise allows us to be your single source for project planning, design and engineering, fabricating, installation, and preventative service.

Creating Customers for Life™

When you choose Bassett Mechanical for your project, you are hiring decades of experience; experts who can innovatively address your mechanical needs today while keeping future needs in mind throughout the process.

We ask the right questions, offer new approaches and insights, and aim to provide the safest solution for our customers. As a single-source provider we can design, engineer, build, fabricate, install, and service your industrial refrigeration system, adding value and protecting the life of your investment.

Value-Add Solutions

- Bassett has one of the largest mechanical contracting teams of designers and engineers in Wisconsin with more than 18 project managers and over 20 engineers and designers
- Engineers with extensive industry experience and expertise providing the best, most customized solution in a timely manner
- 3D CAD and BIM (Building Information Modeling) design tools and scanning
- Pre-fabrication in our 268,000 sq. ft. manufacturing facility which streamlines field installation time and accelerates project completion, leading to shorter downtime and higher quality of installation
- Custom specialty fabrications including ASME pressure vessels, hygienic duct, and skid packages
- Process Safety Management (PSM)
- RETA and CIRO Certified Service Technicians and 24/7 emergency response
- Integrated control systems
- On-going service and customized preventative maintenance agreements

Project Planning & Management

- We approach every project as unique with its own set of requirements. Whether new construction or existing facility, you can be confident that our engineers and project managers will provide an expert assessment of the project, budget, and timeline
- Project management coordinates with your operations and other contractors to minimize disruptions and downtime beginning with the design phase

Additional Capabilities

Beyond our extensive and full-service industrial refrigeration offering, Bassett Mechanical also offers:

- Custom HVAC (Heating, Ventilation, and Air Conditioning) and gas systems
- Automated control systems and controls integration
- Commercial and Industrial Plumbing and Process Utility Piping
- Specialty fabrications including Industrial HVAC ventilation and piping
- Refrigeration and HVAC parts supplier
