- METAL FABRICATING ▪ SERVICE

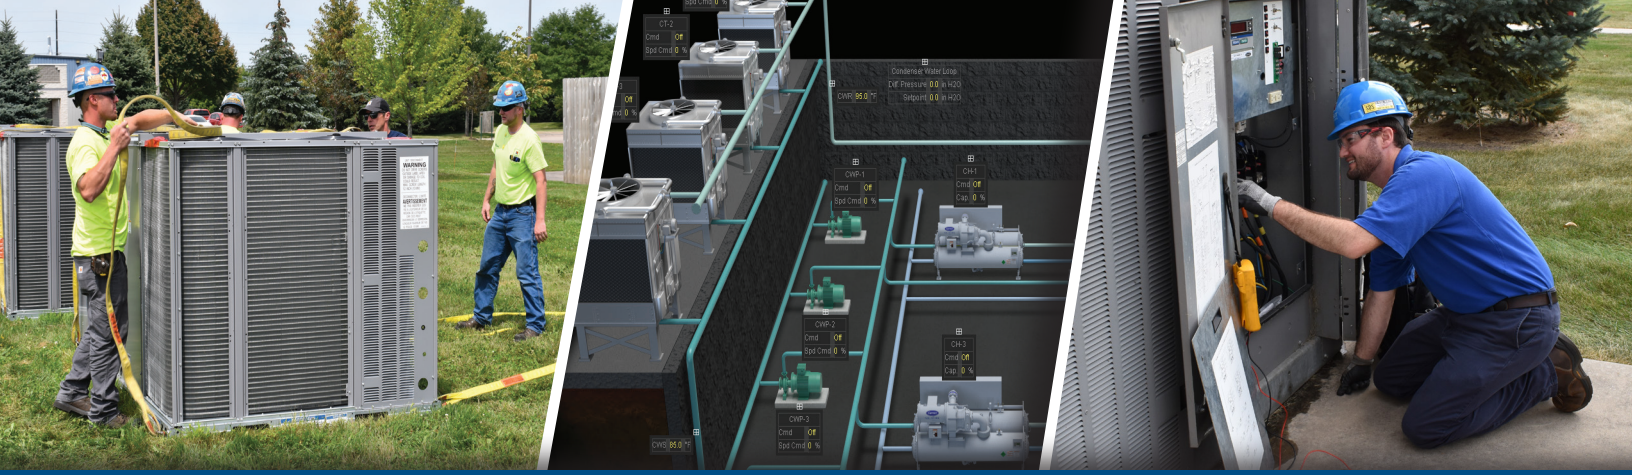

## HVAC

*“Since we’ve partnered with Bassett it’s been great. It’s how we’ve pictured an HVAC contracting partnership should be.”*

– Jay L., Madison Kipp Corporation

*Creating Customers for Life®*

We understand that no two facilities or processes are alike and each have their own specific requirements for heating, ventilation, air conditioning, filtration, humidification control, indoor air quality, and daily operation.

As a full-service HVAC provider, we have the knowledge and expertise to design, build, fabricate, install, and service your industrial and commercial HVAC system and provide the highest quality customized solution to fit your unique needs.

## Design, Build, Fabricate, Install, & Service

Bassett Mechanical has more than 80 years of sustained experience designing, building, fabricating, installing and maintaining state-of-the-art commercial and industrial HVAC systems.

Our controls team works closely with our designers and engineers to integrate a system that suits your specific HVAC requirements, utilizing the most up-to-date technologies and system components.

When the installation of your project is complete, our crew of nearly 100 service professionals can repair and maintain your system providing a comprehensive approach to investigating and evaluating building comfort, equipment reliability, and optimization.

## Services We Provide

- Designers and engineers who are experts in creating efficient and customized solutions to fit customers unique HVAC requirements
- Extensive HVAC service experience of all sizes and types of equipment from rooftop units to large chillers and finely-tuned systems that control critical spaces
- Integrated HVAC control systems
- Customized preventative maintenance solutions, retrofits and equipment replacements keep customers consistently comfortable and equipment reliable while keeping your unique design and energy efficiency top of mind
- Technicians trained specifically to service your top name brand equipment such as Carrier, Trane, Leibert, York, AAON, and McQuay and more

- 24 hour emergency response
- Energy reduction and recovery strategies including energy efficient equipment and components
- Testing and balancing
- Life cycle cost analysis
- Vibration analysis
- Laser alignment
- Energy and utility system surveys
- System and component replacement
- Duct and hygienic duct fabrication
- Carrier Controls Experts
- Parts sales with customized inventory lists
